e-Q5 Balanced Armature Driver INNER EARPHONE

Ortofon's ultra micro audio engineering technology is a culmination of the near 100 years of tradition in pursuit of Accuracy in Sound. The high transparency of the sound and the high sound pressure through out the entire frequency, that is the tonality of the e-Q5

- * : Powerful Hi-Fi sound
- * : Tranparent andvcrystal sound
- * : Acoustic chamber machined out of a solid aluminum block

- * : The right channel earphone has a **red bushing** on the rear to prevent ear mismatch

The graph below illustrates the superior frequency response of Ortofon's balanced armature driver compared with the ordinary eaphone speaker.
