MC-A90

The MC-90 not only celebrates the 90th anniversary of Ortofon, but first and foremost it also makes history by significantly raising the standard by which sound

- Mechanical Design : The simplest design by eliminating unnecessary parts other than audio engine
 SLM manufacturing : Mono-cock chassis : stainless micro powder is laminated by melting by laser
 WRD system : Platinum layer is sandwiched /damped by rubbers to eliminate resonance and vibration unwanted.
 Diamond stylus : The tip of diamond stylus is made the same form as record groove cutting bit for best tracing the groove
 Materials : Gold plated 6N (99.9999 %) pure copper coil is wound on pure iron armature.
 Adjustment : Stylus vertical angle can be adjusted by mirror effect.

Model	Output	Frequency Response	Impedance	Stylus	Tracking force	Weight
MC-A90	2.7mV	10Hz - 80,000 Hz	4Ω	Replicant 100	2.3g	8 g
